**Hiring Manager,
Mayor's Office of Data Analytics,
Mayor's Office of Operations,
253 Broadway # 10,
New York, NY 10007**

Respected Hiring Manager,

As a rising junior at Baruch College pursuing a bachelor's degree in Statistics, I was thrilled to come across the opening for a Data Research Internship position at Mayor's Office of Data Analytics on Starr Search. I believe my technical skills, as well as the alignment of my career goals with the opportunities provided within this role, makes me an appropriate candidate for this position.

With strong statistical background, I resorted to online resources to strengthen my coding skills. In the past few months, I have completed several intermediate online courses in R, Python and SQL. I have naturally gravitated towards Data Visualization tools, such as ggplot2 and seaborn packages.

I have always been interested in public policy. A son of a public servant and the grandson of a leader in our village, I have been exposed to public policy from a young age. With a minor in economics, I have a strong grip on the knowledge of public policy. Also, I am part of the slack team of betaNYC. As such, I took part in the event, "NYC School of Data". Both of these have exposed me to civic data and its role in the society.

I would greatly appreciate the chance to intern for MODA and I look forward to further explaining how I can contribute to your team.

Please do not hesitate to reach out to me via email at tashi.gurung@baruchmail.cuny.edu or via cell phone at (929) 235-3523.

Thank you for your time and consideration.

**Best Regards,
Tashi T. Gurung**
